

Barry Fishburn

Road Safety and Design Specialist

Education

Higher Certificate in Civil Engineering, S.A. Institute of Technology, 1974
Senior Accredited Road Safety Auditor, 1995

Key Skills / Qualifications

Concept development, design and documentation for roads and highways
Road Safety Audits
Heavy Vehicle Route Assessments

Responsibilities and Experience

Barry has over 40 years experience in the provision of road design, road safety and traffic management services to state government, local government and private industry. Barry is an accredited senior road safety auditor and has undertaken in excess of 150 road safety audits. He has been involved in many high profile road projects, and therefore has an excellent appreciation of the issues involved.

Barry's key areas of key expertise include:

- Development of conceptual design, detailed design and documentation for highways and roads
- Project management
 - Project scoping for large and small projects
 - Project management and supervision of the design and documentation
- Development of specification drawings
- Preparing traffic impact assessment reports for both Council and developers
- Restricted access vehicle route assessment
- Provision for road train use assessment
- Road Safety Audits and network Road Safety Audits
 - Black Spot funding audits
 - Pedestrian crossing audits
- Traffic engineering design, advice and analysis

Barry has been a senior road designer and senior road safety auditor with HDS Australia since 1993, prior to which Barry was a senior road designer with DTEI for 29 years.
